## Nexicor fungicide receives EPA registration

New BASF fungicide controls disease and provides plant health benefits for cereal crops

RESEARCH TRIANGLE PARK, NC, November 15, 2016 — BASF's Nexicor™ fungicide, engineered specifically for use in cereals, received registration from the Environmental Protection Agency (EPA). Powered by three modes of action, Nexicor fungicide provides long-lasting preventative and post-infection control of powdery mildew, tan spot, rusts and other diseases frequently found in cereals.

"In addition to controlling disease pressure, Nexicor fungicide helps to provide plant health benefits," said Megan Andriankaja, Technical Marketing Manager, BASF. "Even in instances of low disease pressure, Nexicor fungicide can maximize key plant attributes leading to stronger roots and stems, healthier leaves and a cleaner flagleaf."

For cereal growers, Nexicor fungicide is a convenient and flexible solution. It has a wide application window, from tillering to flag, and it also has multiple tank mix options. More options for tank mixing means fewer passes are needed, which can save growers time in the field.

For more information about Nexicor fungicide, visit [www.nexicorfungicide.com](http://www.nexicorfungicide.com).

Always read and follow label directions. Nexicor is a trademark of BASF.

### About BASF's Crop Protection division

With sales of more than €5.8 billion in 2015, BASF's Crop Protection division provides innovative solutions for agriculture, turf and ornamental plants, pest control and public health. Our broad portfolio of active ingredients, seed treatments, biological controls, formulations and services optimizes efficient production of high quality food and protects against post-harvest loss, damage to buildings and the transmission of disease. By delivering new technologies and know-how, BASF Crop Protection supports the effort of growers and pest management professionals to make a better life for themselves and society. Further information can be found on the web at [www.agro.basf.com](http://www.agro.basf.com) or on our social media channels.
