

Kixor® Herbicide Technology Fast, Flexible Corn Solutions for a Compressed Spring

2010 Commercial Application, Fennimore, WI
Sharpen (2.5 fl oz/A) + PRE grass + atrazine + MSO + AMS

SITUATION

- Fieldwork has stalled due to wet, cool growing conditions
- Weeds have grown unabated in no-till and tilled fields
- Traditional preplant burndown products such as 2,4-D ester are slow to act

NEED

- Once growing conditions improve, the window for weed control and corn planting will be highly compressed
- Weeds will need to be controlled quickly to prevent loss of valuable fertilizer input

SOLUTION

- The family of products powered by **Kixor** herbicide technology provide fast, complete burndown of tough broadleaf weeds
- **Kixor** provides a strong residual foundation for maximum yield potential
- Flexibility to use preplant and preemergence with no restriction

CORN BURNDOWN & RESIDUAL RECOMMENDATIONS*

<p>Sharpen® herbicide (2.0, 2.5, 3.0 fl oz/A) OR Verdict™ herbicide (10-12, 13-15, 16-18 fl oz/A)</p>	<p>+</p>	<p>Recommended rate of glyphosate + MSO + AMS</p>
---	-----------------	---

*Use rates listed for coarse, medium, and fine soils, respectively

APPLICATION REQUIREMENTS

- Adjuvant rates:
MSO (1 gal/100 gals or minimum 1 pint/A) +
AMS (8.5-17 lbs/100 gals)
- Applications must be made prior to crop emergence or severe injury will occur
- 15 GPA carrier volume for optimum performance

Always read and follow label directions.
